REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or suggest, in the claimed combination, a method for making an electronic article with an insulating substrate that need not be of a material that is dimensionally having stable first and second contact sites, including the steps of: preforming a jumper of insulating dimensionally stable material, mounting terminal means and/or circuit patterns on the jumper, mounting electronic devices to the terminals or circuit patterns on the jumper and then mounting the jumper with the electronic component on the terminal sites of the insulating substrate. Kreft discloses a substrate having first and second contact sites with a jumper interconnecting the sites. Kreft fails to teach performing the jumper with at least one electronic component thereon and then subsequently mounting the jumper assembly to the substrate. Neither Covell, II et al. or Kobayashi teach or suggest preassembling a jumper with terminals and/or and subsequently mounting at least one electronic component thereon.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
